

High Level Goals:

- Provide an overview of a student's financial situation
- Provide information about the different kinds of aid
- Provide the ability to create a basic budget for the year

User Stories for release:

Sprint 1:

- As a student, I want to see if I have enough financial aid so that I can go to college.
 - sum total for the year
 - Sources of income vs expenses
- As a designer, I want to create an interface on an android app that is intuitive and easy to use.
 - This makes it simple for students to access their data.

Sprint 2:

- As a student, I want to see how my basic expenses (rent, textbooks, transportation, food, etc.) will cost me this year and possibly the next few years, so I can know what I can afford.
- As a student, I want to use this to keep track of my loans and grants so there are no nasty surprises.
- As, a student, I want to view potential scholarships, and how much they could contribute towards my overall finances

Sprint 3:

- As a student, I want to see the different ways I can use different sources of money to pay for college.
 - Make it useable for scenario type use
- As a student, I want to see where my money is going, so I can be more aware of my finances.
- As a student, I want to have the option to view an approximate 4 year spending plan based on my incomes and expenses

Ideas:

- Color scheme
 - Options?
- Logo
 - Cute ?
 - Mascot
- Custom ui
 - With a center button that displays a menu overlay
- User screen, login, log out ...

Project Backlog

Porting this app to IOS and the web, creating user account control systems and marketing.
